CCMCS401: COMPUTER SKILLS

L4 - ALL DEPARTMENTS

ASSIGNMENT

Question 1:

You are a student in the **NIT Department** at *Padri Vjeko Centre*. Your teacher asks you to prepare a project report about **Computer Networks**.

You decide to save your work properly on the school computer so that you can easily find and edit it later.

Tasks:

1. In your own words, **define a file system** and explain its importance in storing your project work. *(4 marks)*
2. Describe the **steps you would follow to create**:
 - A new folder named **NIT_Project**, and
 - A new Word document inside it named **Network_Report.docx**. *(4 marks)*
3. After saving your work, you realize the file name is too long. Explain how you would **rename** it to **Networks.docx** using a shortcut key. *(2 marks)*

Question 2:

You are helping your classmate organize her files on the school's computer. She has mixed documents, pictures, and videos on the **Desktop**. She asks for your help to make them easier to manage.

Tasks:

1. Explain what a **file system** does in managing files and folders on a computer. *(3 marks)*
2. Write down the correct **steps to create** three folders named **Documents**, **Pictures**, and **Videos** on the Desktop. *(3 marks)*
3. Your friend saved a file named **My_Assignment.docx** inside the *Documents* folder, but she wants to change it to **Final_Assignment.docx**.
 - A. Explain how to **rename** the file using the **F2 key**. *(2 marks)*
 - B. State **why renaming files properly** is important in file management. *(2 marks)*
