L5 Networking and Internet Technology

NITLS501- LINUX SERVER ADMINISTRATIONS

FORMATIVE ASSESSMENT L0-1

1. Identify common use cases of Linux servers in enterprise or organizational environments/ **5pts**
2. **Complete the sentences using the correct words from the brackets: 2pts**
 - A. The Linux server OS consists of several main components, including the _____ (**Kernel / Process**), which is the core of the system, and the _____ (**File / Shell**), which enables user interaction.
 - B. A Linux server operating system is designed to manage _____ (hardware resources / software) and provide network services such as _____ (**website hosting / file hosting**) and database management.
3. **The main components of a Linux server operating system are:**
 - a) Linux Kernel, Shell, and Package Management System.
 - b) Browser, File Explorer, and Antivirus Program.
 - c) Network Drivers, Email Client, and Social Media Apps.
 - d) Word Processor, Image Editor, and Video Player.
4. **The main components of a Linux server operating system are:**
 - a) Linux Kernel, Shell, and Package Management System.
 - b) Browser, File Explorer, and Antivirus Program.
 - c) Network Drivers, Email Client, and Social Media Apps.
 - d) Word Processor, Image Editor, and Video Player.
5. **How does the open-source nature of Linux benefit its development and functionality?**
 - a) It limits contributions to certified developers only.
 - b) It allows anyone to view, modify, and improve the source code, enhancing flexibility and security.
 - c) It prevents customization or future improvements.
 - d) It fixes Linux features permanently without updates
6. **A Linux server operating system is:**
 - a) A system used for personal computing tasks like gaming and web browsing.

- b) An open-source operating system designed to manage server resources, applications, and services.
- c) A proprietary software system for managing databases and spreadsheets.
- d) A system built exclusively for mobile devices.

7. Which of the following are key features of Linux server operating systems?

- a) Multitasking, Security, and Open-Source Licensing.
- b) Video Streaming, File Compression, and Gaming Support.
- c) Search Engine Optimization, Social Media Integration, and Cloud Storage.
- d) Proprietary License, Limited Customization, and High Cost.

8. The tool used for secure remote command-line access to a Linux server is:

- a) FTP
- b) Telnet
- c) SSH
- d) HTTP

9. Match each term with its correct description: (7-marks)

Term	Description	Answer
1. Disk Partitioning	A. Software used for configuring and managing firewall rules.	1. ____
2. File System	B. A process that divides a disk into separate, isolated regions.	2. ____
3. LVM (Logical Volume Manager)	C. Used for organizing and storing files on disk.	3. ____
4. Network Interface Configuration	D. A virtualized partitioning system allowing dynamic disk management.	4. ____
5. SSH (Secure Shell)	E. Command-line tool for secure remote access to a server.	5. ____
6. Package Manager	F. System used to install, update, and remove software packages.	6. ____
7. Firewall Configuration	G. Process of configuring IP addresses and gateways.	7. ____

SCENARIO: 10-marks

PADRI VJEKO CENTRE TSS, a technical and vocational school with over 500 students and 30 trainers, offers training across four departments — NIT (Networking and Information Technology), FAD (Fashion and Design), WOT (Wood Technology), and BDC (Building and Construction).

To enhance performance, reduce software licensing costs, and improve system reliability, the school plans to migrate its academic and administrative systems to Ubuntu Linux Server. The new server environment will host key services such as student management systems, attendance tracking, file sharing, web hosting for departmental projects, and local intranet access for trainers and students.

Task:

As the System Administrator of **PADRI VJEKO CENTRE TSS**, outline the steps and considerations you would take to install and configure Ubuntu Linux Server to support the school's operations efficiently.

GOOD LUCK!
