

### **Conditional Statements** (3 exercises — use if / elif / else)

#### **Q1 Check if a Number is Positive or Negative**

Write a Python program that asks the user to enter a number and checks whether it is **positive**, **negative**, or **zero**.

#### **Q2 Check for Even or Odd**

Write a program that accepts a number from the user and prints whether it is **even** or **odd**.

#### **Q3 Find the Largest of Two Numbers**

Ask the user to input two numbers and print which one is **greater** or if they are **equal**.

### **Loop Statements** (3 exercises — use for and while)

#### **Q1 Print Numbers from 1 to 10**

Use a for loop to print numbers from **1 to 10**.

#### **Q2 Sum of First N Natural Numbers**

Write a program that takes a number n from the user and uses a while loop to calculate the **sum of the first n numbers**.

#### **Q3 Print Multiplication Table of a Number**

Ask the user to enter a number and print its **multiplication table up to 10** using a for loop.

## Jump Statements (3 exercises — break, continue, pass)

### Q1 Stop Printing When 5 is Reached

Use a for loop to print numbers from **1 to 10** but **stop** when the number is 5.

### Q2 Skip Printing Number 5

Write a for loop that prints numbers from **1 to 10**, but **skips** number 5.

### Q3 Use pass in a Loop

Write a loop from **1 to 5**. If the number is 3, use pass and continue to the next iteration, printing all other numbers.

## Python Functions (3 exercises — simple functions with no nesting)

### Q1 Personalized Greeting Function

Create a function named `greet_user(name)` that takes a person's name as a parameter and prints a personalized greeting like **"Hello, Alice! Welcome to Python Programming."** Call the function and pass your own name as an argument.

### Q2 Square a Number

Write a program of function named `square()` that takes a number as a parameter and **returns its square**.

### Q3 Find the Average of Two Numbers

Write a program of a function named `average()` that accepts two numbers and **returns their average**.
